

Lock Lock Program

Personal Cabinets

Materials and finishes

Cabinets made of sheet steel painted with epoxy- polyester paint.

Base made in sheet steel of 1 mm of thickness and equipped with adjustable levelers from the inside.

Drawers made with agglomerated chipboard drawers of 16 mm coated of laminate with ABS edge.

Doors made in sheet steel of 0,8 mm or laminate on agglomerated board support of 19 mm with ABS edge of 1 mm.

Environmental improvement

- High percentage of recyclability of materials used in the manufacture of products.
- Priority is given to the use of materials with recycled origins.
- Use of FSC/PEFC wood.
- Local suppliers.
- The metal parts are painted with epoxy-polyester paint.
- More than 99% of the excess paint is collected and reused. The paint used does not contains COVs neither heavy metals.
- Easy separable components for later recycling.
- The glue used for pasting the edge of the boards does not emit COVs.
- Optimized product volume and weight.

Service provision and equipment

- Standard doors have a lock with replazable bulb. The keys are flat for convenience of use and articulated to avoid accidental breaks.
- Doors swing on 110 degrees opening hingers.
- Drawers run on sheel telescopic guides.
